## Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

- 1-40. (Cancelled)
- 41. (New) An apparatus for manufacturing a color filter, comprising:

  a plurality of nozzles for ejecting a filter material in droplets; and

  a plurality of heads, each head having the plurality of nozzles linearly arranged

  with a constant layout pitch of (D), the plurality of heads are arranged to form a linear row of

  nozzles.
- 42. (New) An apparatus for manufacturing an electroluminescence substrate, comprising:
- a plurality of nozzles for ejecting a filter material in droplets; and
  a plurality of heads, each head having the plurality of nozzles linearly arranged
  with a constant layout pitch of (D), the plurality of heads are arranged to form a linear row of
  nozzles.
- 43. (New) A method for manufacturing a color filter, comprising:

  scanning a substrate by moving a table and a plurality of heads; and
  ejecting a filter material in droplets by a plurality of heads, each head having a
  plurality of nozzles arranged with a constant layout pitch of (D), the plurality of heads are
  linearly arranged to form a linear row of nozzles.
- 44. (New) A method for manufacturing an electroluminescence substrate, comprising:
  - scanning a substrate by moving a table and a plurality of heads; and

ejecting a functional layer forming material in droplets by a plurality of heads, each head having a plurality of nozzles arranged with a constant layout pitch of (D), the plurality of heads are linearly arranged to form a linear row of nozzles.
